

## Annex A. Consultation with experts

The recommendations presented in this report were supported by a series of interviews and focus group discussions conducted by the OECD team with experts in the Netherlands from February to April 2021. Initial interview subjects were identified by the Ministry of Health and Welfare. These interview subjects recommended other experts for the OECD to consult. The OECD continued interviews until the information gathered from key informants began to share similar messages. Further rounds of interviews and focus groups took place from June to October 2021, gathering experts' reflections on proposed recommendations and expanding our understanding of the data landscape and recent innovations in the Netherlands.

The OECD thanks and appreciates the contributions of the following experts whose insights, experiences and aspirations informed the development of these recommendations.

**Table A A.1. Experts interviewed about the health information system in the Netherlands**

Name	Position	Organisation
Caroline A. Baan	Science Officer	Ministry of Health, Welfare and Sport
