

ANNEX B. CLASSIFICATION SYSTEMS BY PRODUCT

The *United Nations Central Product Classification* (CPC) Ver.2 is a coherent and consistent classification based on the physical characteristics of goods or on the nature of the services rendered. Each type of good or service distinguished in the CPC is defined in such a way that it is normally produced by only one activity as defined in ISIC. The CPC covers products that are an output of economic activities, including transportable goods, non-transportable goods and services.

Annex B presents correspondence tables of CPC with the *Classification of Products by Activity* (CPA) – the CPC equivalent European Union classification.

Correspondence tables are available in excel format for the corresponding product of service industries presented in annex A. They are available at the following address: <http://dx.doi.org/10.1787/888933175821>
