Foreword

Digitalisation and globalisation have had a profound impact on economies and the lives of people around the world, and this impact has only accelerated in the 21st century. These changes have brought with them challenges to the rules for taxing international business income, which have prevailed for more than a hundred years and created opportunities for base erosion and profit shifting (BEPS), requiring bold moves by policy makers to restore confidence in the system and ensure that profits are taxed where economic activities take place and value is created.

In 2013, the OECD ramped up efforts to address these challenges in response to growing public and political concerns about tax avoidance by large multinationals. The OECD and G20 countries joined forces and developed an Action Plan to address BEPS in September 2013. The Action Plan identified 15 actions aimed at introducing coherence in the domestic rules that affect cross-border activities, reinforcing substance requirements in the existing international standards, and improving transparency as well as certainty.

After two years of work, measures in response to the 15 actions, including those published in an interim form in 2014, were consolidated into a comprehensive package and delivered to G20 Leaders in November 2015. The BEPS package represents the first substantial renovation of the international tax rules in almost a century. As the BEPS measures are implemented, it is expected that profits will be reported where the economic activities that generate them are carried out and where value is created. BEPS planning strategies that rely on outdated rules or on poorly co-ordinated domestic measures will be rendered ineffective.

OECD and G20 countries also agreed to continue to work together to ensure a consistent and co ordinated implementation of the BEPS recommendations and to make the project more inclusive. As a result, they created the OECD/G20 Inclusive Framework on BEPS (Inclusive Framework), bringing all interested and committed countries and jurisdictions on an equal footing in the Committee on Fiscal Affairs and its subsidiary bodies. With over 140 members, the Inclusive Framework monitors and peer reviews the implementation of the minimum standards and is completing the work on standard setting to address BEPS issues. In addition to its members, other international organisations and regional tax bodies are involved in the work of the Inclusive Framework, which also consults business and the civil society on its different work streams.

Although implementation of the BEPS package is dramatically changing the international tax landscape and improving the fairness of tax systems, one of the key outstanding BEPS issues – to address the tax challenges arising from the digitalisation of the economy – remained unresolved. In a major step forward on 8 October 2021, over 135 Inclusive Framework members, representing more than 95% of global GDP, joined a two-pillar solution to reform the international taxation rules and ensure that multinational enterprises pay a fair share of tax wherever they operate and generate profits in today's digitalised and globalised world economy. The implementation of these new rules is envisaged by 2023.

This report was approved by the Inclusive Framework on 10 February 2023 and prepared for publication by the OECD Secretariat.
